Forecast for Tuesday 14 Sep 2021

Weather: A damp start to the day with quite a lot of cloud around, although a few sunny spells are possible in the west. The cloud will slowly lift and break during the morning, perhaps leading to the odd shower in the afternoon but overall, it will be a fine and dry end to the day with good periods of sunshine.

Chance of cloud free mountain/hill tops above 600m: 10% in the east but 40% in the west, slowly becoming 95% early afternoon.

Visibility: Often very poor during the morning at higher levels, with periods of cloud above around 400m. Cloud bases rising to around 700m during the morning and becoming more fragmented, although some ragged scraps of cloud are likely to persist on some slopes around 400m.

Meteorologist's View

Low cloud bases during the morning will make for difficult navigation on some of the higher and more featureless terrain. Damp at first, making rock surfaces particularly slippery.

Forecast for Wednesday 15 Sep 2021

Weather: Low cloud may well become fairly extensive during the early hours and will take a while to lift and break during the morning. Some sunny intervals are likely by late morning with some lengthier sunny periods during the afternoon.

Maximum wind: North-westerly 5-15mph.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 80%

Visibility: Periods of cloud will cover many slopes above 400-500m at first, giving very poor visibilities across much of the area. The cloud will tend to slowly thin and break through the morning to give periods above 600-700m by the afternoon. Visibilities below the cloud will be very good with distant hills and landmarks clearly visible.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 19 Celsius.
At 600m: Plus 14 Celsius.
Freezing level: Well above the summits.
